15 GAUGE ANGLED FINISH FN 34-35

15 Gauge Bostitch style "FN" series	35
---	----

16 GAUGE BOSTITCH STYLE AF 36-37

16 GAUGE STRAIGHT FINISH..... 38-39

18 GAUGE STRAIGHT FINISH..... 40-41

23 GAUGE MICRO PINS 42-43

15 GAUGE MEDIUM CROWN STAPLES..... 44-45

16 GAUGE MEDIUM CROWN STAPLES 46-48

16 GAUGE WIDE CROWN STAPLES 50-52

18 GAUGE NARROW CROWN STAPLES 54-55

HAMMER TACKER STAPLES 56-59

TOOL CROSS REFERENCE GUIDE..... 60-67

Collated Nails

Choose the right nail for your tool and project.

When it comes to buying nails for nail guns, you can choose among three main types of collation. Manufacturers use either paper, plastic, or wire to hold strips or coils of nails together at the appropriate angle and spacing for the particular nail gun being used. Nails are available in a variety of finishes, head, shank and point types designed for particular jobs.

SteelLinx collated fasteners can be used in virtually any brand of tool and we have cross referenced not only the different types of collated fasteners, but also included a list of all brand name manufacturers and tools to help you find the exact fastener you're looking for.

Components of Collated Nails

NAIL HEAD TYPES

FULL ROUND HEAD

FULL ROUND HEAD OFFSET

CLIPPED HEAD

NAIL SHANK TYPES

SMOOTH

Most common shank and easiest to produce but provides least amount of holding power.

RING

Concentric rings around the shank of the nail provide great holding power.

SPIRAL

Nail turns into wood while being driven similar to a screw.

NAIL POINT TYPES

BLUNT DIAMOND

Most common nail point used today because it reduces splitting while driving.

DIAMOND

Provides easiest drivability. Used primarily in soft woods to prevent splitting.

FINISH TYPES

ELECTRO-GALVANIZED

Plain steel coated with zinc through electrical charge; provides minimal corrosion resistance.

HOT DIPPED GALVANIZED

Zinc is applied in a tumbler at room temperature. Consistent with hot dipped galvanizing in terms of corrosion resistance but provides even coating and smooth finish.

STAINLESS STEEL

Lifetime corrosion resistance. Great for treated lumber, redwood and cedar. Also recommended for coastal areas.

VINYL COATED

Vinyl coating applied to create ease of drivability and better holding power.

MAGNETO HYDRODYNAMICS

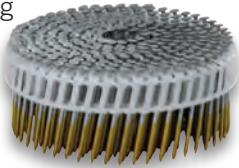

Eco-friendly technology, where magnets are used to apply molten zinc to wire rod. Provides good corrosion resistance and acceptable for all types of pressure treated wood and exterior applications. Galvanization meets ASTM A 153 Class D.

COLLATED NAILS BY TYPE OF COLLATION:

0° & 15° Plastic Sheet Coil

- Siding & Fencing
- Framing

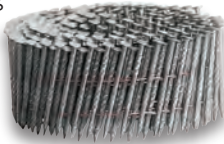

Pages 8-9

15° Wire Coil

- Siding & Fencing
- Framing
- Pallet Mfg

Pages 10-17

15° Wire Coil

- Roofing

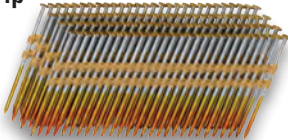

Pages 14-15

21° Plastic Strip

- Framing

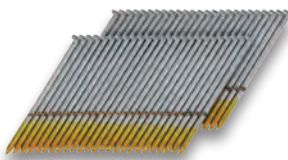

Pages 18-21

28° Wire Strip

- Framing

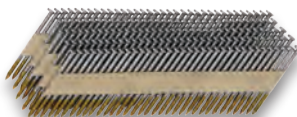

Pages 22-24

33° Paper Tape Strip

- Joist Hanger
- Framing

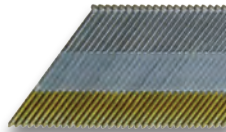

Pages 26-31

15 Gauge Angled DA Brads

- Finish Trim
- Moulding

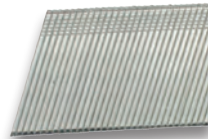

Pages 32-33

15 Gauge Angled Finish Nails

- Finish Trim
- Moulding

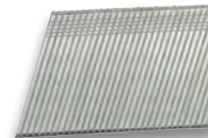

Pages 34-35

16 Gauge Angled Finish Brads

- Finish Trim
- Moulding

Pages 36-37

16 Gauge Straight Finish Nails

- Finish Trim
- Moulding

Pages 38-39

18 Gauge Straight Finish Brads

- Finish Trim
- Moulding

Pages 40-41

23 Gauge Micro Pins

- Trim
- Hobby Work

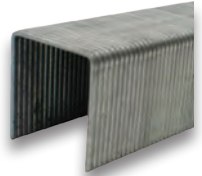

Pages 42-43

Wide Crown Staples

- Shingle
- Lathing & Truss

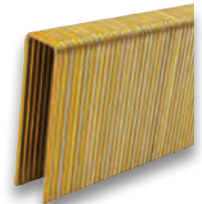

Pages 50-52

Medium Crown Staples

- Sheathing
- Decking & Crating

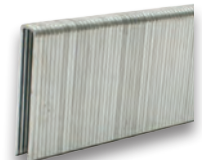

Pages 46-48

Narrow Crown Staples

- Finish Trim

Pages 54-55

Hammer Tacker Staples

- Insulation
- House Wrap
- Roofing Felt

Pages 56-59

Labels & Color Codes

Every box of SteelLinX collated nails comes with a user friendly label which helps the end user to identify the correct type of fastener for their tool and construction project. The SteelLinX label will have a colored background to show the type of application as well as a color band for the type of collation.

All fasteners that are labeled with a YELLOW background are for General Construction and are used in general building such as framing, sheathing, trim & finish. These fasteners are all vinyl coated and are not to be used where the fastener will be exposed to the elements.

All fasteners that are labeled with a GREEN background are for Outdoor Construction and are used where the fasteners will be exposed to the elements, such as framing, fencing and soffit. These fasteners will have an Electro Galvanization coating and are not approved for use with any type of pressure treated wood.

All fasteners that are labeled with a SILVER background are for Outdoor Construction and are used where the fasteners will be exposed to the elements, such as framing, fencing and soffit. These nails will be Stainless Steel, or have an Hot Dipped Galvanization coating. Nails with this silver label are approved for use with any type of pressure treated wood.

All fasteners that are labeled with a BLUE background are for Roofing & Siding Construction and consist of fasteners used to attach shingle or siding products to buildings. These nails will be Stainless Steel, or have an Electro Galvanized or Hot Dipped Galvanized coating.

Looking for nails made right here in the USA?

SteelLinx is now offering 33° clipped head nails made in the USA. Go after all those government jobs and sell them the highest quality nail made in the world.

Start with better nails: SteelLinx Pro-Nails meet the highest specifications in the industry with the finest steel manufactured to full gauge for more driving force and greater lateral shear strength.

Galvanize with our unique MP-2000™ mechanical plating process that impinges the special Tri-Alloy™ onto the surface of the nail for unbeatable fusion that has corrosion-tested to 2,000 hours and beyond!

Add SteelLinx Yellow Dichromate finish which we then coat with a special organic sealer for a fastener with triple corrosion-protection for every kind of pressure-treated lumber...for every kind of above-ground application! We guarantee it for life!

Tri-Coat Hi-Galv Pro-Nails also feature an exclusive Hold-Fast™ acrylic coating for the best holding power in the industry! Better nails. Better corrosion protection. Better holding power. All backed by our SteelLinx limited lifetime guarantee!

SteelStamp

In a continuing effort to innovate time and money saving solutions for the job site, SteelLinX offers SteelStamp. An embossed letter stamped into the head of the nail instantly identifies its length and diameter allowing building inspectors to validate the correct fastener is being used without removing the nail. Steel Stamp is one of the most recognized and reputable coding system for fasteners.

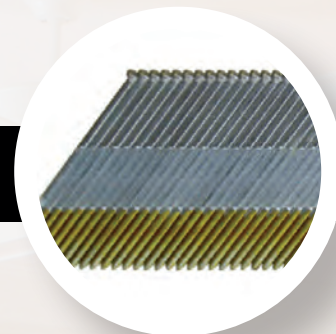

Length	Diameter	Nail Type	SteelStamp Emboss ID

Notes:

SteelLinx[®]

Your reinforcements are here

From rebar to poly film, you can rely on SteelLinx as your single source for concrete construction products. And as with all our products, you can count on the most competitive price and the dependable BlueLinx service you know and trust.

Rebar & Remesh

As one of the nation's largest distributors of rebar and remesh, at BlueLinx we connect you to one of the most comprehensive lines of concrete forming, fabrication products and accessories. Our extensive product selection means you can rely on one supplier who understands your business and works with you to deliver the products you need.

Forming Lumber

Choosing BlueLinx lumber for your next cement forming project, means you're not only using a quality product that can stand up to multiple use, but it also makes efficient use, of natural resources. BlueLinx deals in many Forest Stewardship Council (FSC) wood products which supports continued growth in our forests as well as the building industry.

3M Products

BlueLinx is proud to be an authorized wholesale distributor of 3M[™] products. We offer a wide selection of 3M[™] innovations that include tapes, adhesives, abrasives, and safety products. With low minimums, short lead times and a vast selection of available products, BlueLinx is your single source for all of your 3M[™] construction needs.

BlueLinx
America's Building Products Distributor

Call your BlueLinx rep. for more information on all our concrete accessories.
