SteelLinx®

Your reinforcements are here.

The key to any successful roofing or siding project begins with a high quality fastener suited for the specific application — you can count on SteelLinx fasteners to consistently deliver excellent results.

As America's building products distributor, BlueLinx is always looking for ways to save our customers money and increase sales. Our SteelLinx line of fasteners nails it!

Collated Staples

Electro-galvanized and available in all standard crown widths, leg lengths and quantities.

Interchangeable with most brand name tools for use in shingle and sheathing construction.

- Wide Crown Staple
- Hammer Tacker Staple

Collated Nails

SteelLinx 15° Full Round Head Wire Weld Collated Coil and Hand Driven Roofing Nails are now approved for use in Miami Dade County and other coastal areas where corrosion and high wind uplift resistance are needed. These ring shank nails provide ultimate holding power and withstand the ASTM G85 test protocol required for the important Miami Dade County approval.

Electro-galvanized, available in a variety of diameters and lengths and interchangeable with 37 different tools!

- 15° Wire Coil

Windstorm Approved

Hand Driven Nails

You'll find that SteelLinx offers one of the most comprehensive lines of hand driven nails for all types of roofing and siding materials and applications in the industry.

Available in quantities from 1 lb. tubs to 50 lb. cartons, to suit any size job.

- Roofing, Ring & Smooth
- Copper Roofing, Smooth
- Tile, Smooth
- Plastic Cap, Ring
- Metal Round Cap, Ring & Spiral
- Metal Square Cap, Ring & Spiral
- Neowasher, Ring
- Aluminum Neowasher, Ring

Creating tools for success

SteelLinx user friendly packaging

Every container of SteelLinx fasteners comes with a user friendly label which helps to identify the correct type of fastener for their specific construction project. Our collated packaging includes additional coating and cross reference tool charts to help you locate the exact fastener you're looking for – fast!

Collated tool cross reference & coating chart on every box

BRIGHT VINYL COATED

Vinyl coating applied to create ease of drivability and better holding power. Should not be used for any type of pressure treated wood and should not be used in exterior applications where the fasteners will be exposed to the elements.

ELECTRO GALVANIZED

Provides minimal corrosion resistance and should not be used for any type of pressure treated wood and should not be used in exterior applications where the fasteners will be exposed to the elements.

HOT DIPPED GALVANIZED

Provides good corrosion resistance and is acceptable for all types of pressure treated wood and exterior applications. Galvanization meets ASTM A 153 Class D.

EXTERIOR GALVANIZED

Provides superior corrosion resistance and is acceptable for all types of pressure treated wood and exterior applications. Exterior galvanized coating is equivalent in performance to galvanization that meets ASTM A 153 Class D.

MAGNETO HYDRODYNAMICS

Eco-friendly technology, where magnets are used to apply molten zinc to wire rod. Provides good corrosion resistance and acceptable for all types of pressure treated wood and exterior applications. Galvanization meets ASTM A 153 Class D.

STAINLESS STEEL

Lifetime corrosion resistance and is acceptable for all types of pressure treated wood and exterior applications. Stainless Steel provides superior performance in cedar, redwood and coast markets.
