- ✓ Coast-to-Coast Distribution

BlueLinx is the leading wholesale building products distributor for the top brands and customers in North America for homes and commercial construction. With warehouses across the country and a strong logistics network, we pick, pack, and ship the most sought-after materials to retailers and builders across America – completely, accurately, and on time. Since 1954, BlueLinx has been a proud blue-collar company of dedicated people who use their hands and skills to help transform building products into strong, secure businesses, houses, and homes. We emerged out of the plywood distribution division of Georgia-Pacific Corporation and have grown to become a preeminent partner for specialty materials suppliers, retailers, and professionals in the construction industry. BlueLinx is headquartered in Atlanta, Georgia.

Composite Deck Boards

The Solid Core Difference™

MoistureShield® offers the only wood composite deck board that can be installed in the ground, on the ground and underwater. That's because every MoistureShield® deck board is equipped with a proprietary Solid Core. This innovation creates an impermeable barrier that fights against damage from moisture, rot, insects, and other harmful elements — all day, every day.

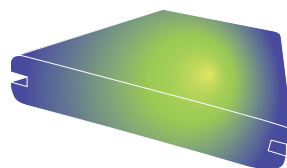

Comfort.

CoolDeck® Technology

MoistureShield® created CoolDeck® Technology to help reduce heat absorption by up to 35%* so you can stay much cooler under the hot summer sun. Available in Vision® and Meridian™ capped wood composite lines, MoistureShield® is the first company to offer this heat-resistant composite decking innovation that can help you create more comfortable outdoor environments, all season long.

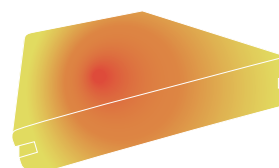

MoistureShield with CoolDeck Technology

Up to

35% Less Heat

Standard Capped Composite Decking

VS

160°F+

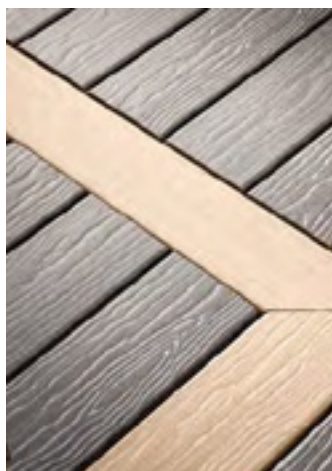

* Reduces heat absorption by up to 35% compared to standard capped composites in a similar color. CoolDeck Technology is available in select colors in the Vision and Meridian lines.

Durability.

Diamond Defense™ Coating

You choose composite decking to avoid maintenance, like painting and staining. So why settle for products that scratch and chip on impact? With MoistureShield DiamondDefense™ technology, the liquid polymer coated deck boards create the strongest capped wood composite board on the market to help you prevent damage from scratching and impact.

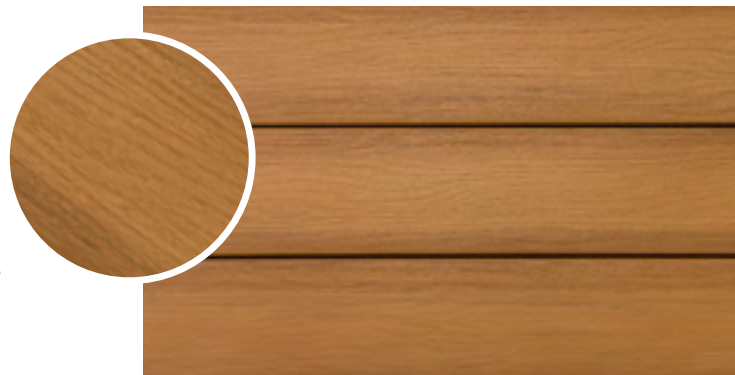

Beauty.

TruTexture™ Surface

The proprietary TruTexture™ Surface utilizes advanced techniques to deliver lower pattern repetition, rich color variegation and a realistic wood grain texture in each composite decking board. And with added scratch resistance, you'll spend less time on maintenance and more time enjoying your ultimate backyard sanctuary.

Elevate™

Strong, Dynamic, Fundamental.

Get advanced protection and beauty without breaking your budget with Elevate composite decking. MoistureShield's introductory capped wood composite board is shielded with a strong, protective barrier to help prevent damage from impact, corrosion, and weathering in virtually any environment. Additional defense lies in the proprietary Solid Core for zero structural field failures on the ground, in the ground or underwater. Available in a curated selection of classic and premium color options, Elevate capped composite decking allows you to create a stylish, durable outdoor environment simply and affordably.

Vantage™

Versatile. Durable. Dependable.

Decking gets an upgrade with an uncapped composite decking board that works better than pressure-treated lumber. When it comes to creating custom artisan decks, no material cuts, rips or bends better while still maintaining its integrity. That's because MoistureShield's Solid Core runs through the entire Vantage deck board to ensure protection without a cap. As a result, there's no need for painting, staining and yearly repairs with Vantage boards, a beautiful decking option that's resistant to moisture, rot, and warping.

Fiberon PVC & Composite Decking

The Fiberon logo, featuring the word "fiberon" in a stylized font with a red dot over the 'i' and a red underline.

Fiberon Decking

Make every weekend count.

Fiberon believes that decks are meant to be enjoyed, not maintained. Our composite PE and PVC decking won't warp, rot or splinter, so the look you love today will be there tomorrow. Wood decking simply can't compare.

Benefits of Fiberon Composite Decking vs. Wood

Composite decking features a protective cap layer for added durability and performance.

Will not splinter, crack or split, making it safer for bare feet, children and pets.

Less than \$50 in annual maintenance costs and a high-end look that lasts.

Low maintenance material requires just an occasional soap and water cleaning.

Manufactured using sustainable processes and free of toxic chemicals.

Approved for use in all Wildland Urban Interface (WUI) zones and meets additional fire performance requirements of San Diego County, ASTM E84 FSI 30 Class A.

DECK | PROMENADE WEATHERED CLIFF

Fiberon PVC Decking

Paramount | \$\$

- *Lightweight, easy-to-handle boards.*
- *Resists moisture, dents and flames.*
- *Exceptional slip resistance* when wet or dry. *Based on comparative results from independent testing to ASTM F1679.*
- *Boards won't warp or swell when submerged in water, even after being cut.*
- *When tested against wood or composite boards, Paramount resisted mold, water absorption and discoloration better than the rest.*

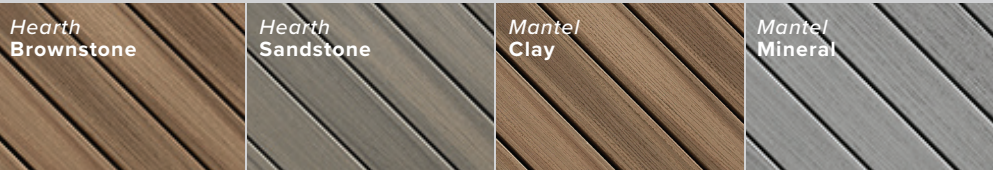

Promenade | \$\$\$

- *Promenade deck boards resist cracks, splinters and mold.*
- *A slip-resistant surface texture makes Promenade decking perfect for docks, marinas and other waterside applications.*
- *Tested for use in fresh water, salt water and chlorinated water environments.*
- *The lightweight, easy-to-handle boards float, making them easy to install in or under water, and won't warp or swell when submerged in water, even after being cut.*
- *Promenade deck boards feature four-sided capping and a next-generation surface coating for superior weather resistance and durability.*
- *When tested against wood or PE boards, Promenade resisted mold, water absorption and discoloration better than the rest.*

Wood Decking

Cedar, Pressure Treated Pine, Thermory Modified Wood, & Hardwood

Softwood Lumber Decking

Softwoods are a popular choice because they're economical, naturally resistant to insects and rot, and long-lasting when maintained correctly. Even the least expensive composites cost more than softwood boards.

Thermory Modified Wood

Durable Decking With Beauty and Longevity In Every Fiber.

- Touchable smoothness for a splinter-free life
- Easy Installation
- JEM Joists
- Low Maintenance

Available in Select Markets Only

Cedar

Naturally Strong. Naturally Durable. Naturally Beautiful.

- Real Wood Beauty
- Pitch and Resin Free which means it is ideal for accepting and holding a wide range of beautiful finishes
- Wide Range Lumber Dimensions, Textures and Grades
- Sustainable

Pressure Treated Pine

Economical and durable, XGUARD treated wood products are proven performers for outdoor structures.

- Proven long-term protection against rot, fungal decay, and termite attack
- Lighter, more natural appearance
- Broad offering of grades, sizes, and treatments
- Budget-friendly

Railing

MoistureShield® Solid Core™ Composite Railing

SOLID CORE™ RAILING

by MoistureShield®

MoistureShield® Solid Core™ Composite Railing

High-performance composite railing engineered to deliver 360-degree protection, 365 days a year. Engineered to withstand the elements, resistant to mold and will not rot, splinter, warp, or stain. Finding the right style is easy with these three distinct series.

Discovery Series | \$

Discovery Series composite railing offers a traditional breadloaf profile with a smooth glossy finish. Add the optional deck board adapter to create a flat cocktail rail for added style and convenience. Featuring concealed fasteners, two infill style options, and offered as a complete kit including top and bottom rails, infill, and brackets — everything you need between the posts for a clean, finished look.

- Solid Core™ composite with PVC cap stock provides durability with the look of real wood
- Will not rot, splinter, warp or stain
- No squeaks or rattles
- Concealed fasteners offer a clean and polished look

MoistureShield® Fathom™ Steel Railing

**FATHOM™
RAILING**
by MoistureShield®

MoistureShield® Fathom™ Steel Railing

Steel railing is incredibly durable, making it a tough opponent for unpredictable, windy weather. With a premium powder coating, this steel railing was designed to last and is a stylish complement for deck railing or porch railing. From traditional to modern styles, homeowners can design and create their perfect complimentary steel railing from the several infills are offered.

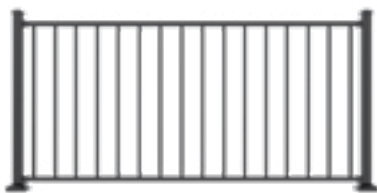

MOISTURESHIELD® FATHOM™ RAILING | HORIZONTAL ROD INFILL

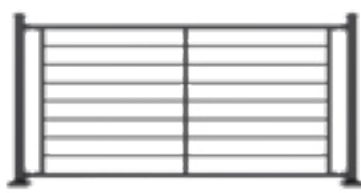

Offering the strength of steel in a traditional and timeless style, Fathom™ Steel Railing is a good choice for both residential and commercial installations. Select from traditional vertical 5/8" square infill or more modern style horizontal infill for a unique look. Available in textured matte black and hammered bronze finishes and with adapters that easily allows a deck board to be added to create a flat, "cocktail rail."

- *Sizes: 10' x 36", 6' x 36", 6' x 42", 8' x 36", 8' x 42"*
- *Panels with square vertical balusters are factory welded*
- *Pre-attached brackets on posts make level installation easy and ensure consistent bottom spacing*
- *Deck top brackets allow for installation of a deck board to create a "cocktail rail"*
- *Premium powder coating provides maximum durability*
- *15 Year Limited Warranty*

- *Color matched post caps available for most railing styles*
- *Solar post caps with down lighting available for dramatic lighting effect*

Accessories

Fasteners

Fasteners

Starborn

Structural Connectors

Starborn® Structural screws are designed for professional builders who demand higher levels of performance and enhanced usability. They are fully tested and code compliant alternatives to traditional lag screws and through-bolts, with no predrilling required.

CAP-TOR® decking screws

CAP-TOR® xd screws are specifically designed to fasten PVC and composite capstock decking with a clean, smooth and uniform finish. They also work equally well in traditional composites. CAP-TOR® xd screws are available in 20 different colors to match all of the leading PVC and composite deck boards on the market.

Pro-Plug decking plugs

Hidden Fastening Solution for MoistureShield® Elevate™ decking. The system uses our precision Scalloped Deck Template to properly place screws in the thickest section of board.

Pro-Plug fascia plugs

Hidden fastening system that securely fastens deck fascia and cladding while also allowing boards to expand and contract freely. Precision cut plugs are made from actual fascia material.

Joist Tape

Don't let your substructure go unprotected. Ensure every inch of your deck is designed to defy the elements with joint protection tape. Its patented acrylic adhesive and woven cloth substrate creates a tight seal over your joist boards and deck screws to prevent moisture infiltration.

- Adds up to 10+ years of life to your deck
- Tears easily by hand without tools
- Seals tightly around deck screws, preventing moisture infiltration and corrosion
- For application temperatures between -20°F to 200°F (-29°C and 93°C)

Hidden Fasteners

Get the most seamless installation possible with MoistureShield's exclusive hidden deck fastening system — Beautiful, durable and backed by a limited lifetime warranty against loose deck boards.

Aegis Clip™

The Aegis Clips feature teeth that make them ideal hidden deck fasteners for fitting into the grooved edges of composite decking boards, reducing lateral movement for added stability. Made with glass-reinforced plastic for lasting strength and durability, these deck clips use a 90-degree installation process that makes installing and replacing boards easy.

- Tight fit for added stability
- Glass-reinforced plastic for durability
- Pre-inserted screws for easy installation
- Consistent 3/16" spacing between deck boards
- 90-degree installation
- Works with wood or metal frames

MoistureShield® Deck Clip

MoistureShield Deck Clips are custom designed to fit securely into the grooved profile of our deck boards for superior holding power. Made in high-strength carbon or stainless steel, they also extend the life of your deck by elevating the boards off the joists, increasing air flow and reducing moisture buildup that can damage substructure.

- Custom design fits securely
- Reduces possible moisture buildup
- Available in high-strength carbon or stainless steel
- Installs with pneumatic gun or regular drill
- Compatible with wood frames
