PROLinx[®] Premium Pattern Grade Options

Charleston	Durham	Savannah
<p>Our customers have high expectations when it comes to pattern stock. The ProLinx[®] Premium Pattern in Charleston Grade goes above and beyond industry grade rules. The majority of Charleston Grade will feature one (if not two) clear sides, and exceeds C-grade specifications.</p>	<p>Durham Grade is a great option for customers who desire some natural wood characteristics in their projects... but not too much. A large percentage of our Durham Grade will meet C-grade rules with the balance exceeding D-grade specifications.</p>	<p>Savannah Grade is ideal for consumers who want to highlight the natural character in wood, while still receiving product that is usable in flooring, wall or ceiling applications. Only the highest grade of Premium #2 is used to produce our finished products. Any non-usable defects are removed from Savannah Grade, leaving you with material that is ready to install.</p>
		

Product Features

- PROLinx[®] Premium Pattern is made from Southern Yellow Pine, which is a renewable resource. SYP trees are fully mature and ready to be harvested in only 20-25 years.
- All profiles include a tongue and groove or ship lap joint for ease of installation and allow for most fasteners to be hidden.
- Many profiles are reversible, allowing for a variety of installation options as well as reduced inventory.
- Material is surfaced and ready for finishing.
- This product is proudly made in the USA.
- Over 30 different profiles in stock, with hundreds available via special order.
