

Reliable weather protection.

BlueLinxCo.com

Professional contractor grade for moderate to severe weather.

PROLinX[®] BUILDING WRAP *Select*

An unbeatable combination of value and performance.

Ideal for projects requiring reliable weather protection, PROLinX[®] Select balances breathability with a high level of water resistance. Easy to install, it's durable and strong due to woven fabric construction, making it a terrific value. PROLinX[®] Select is available with digital printing to display any logo or advertising message.

BLUELINX
DELIVERING WHAT MATTERS™

Benefits:

- **Higher Performance** Micro-perforations designed for maximum performance. We don't just punch holes in the material – our perforations have been designed with the angle, size, and direction that offer maximum performance.
- **Resists Bulk Water** Resists water penetration from wind-driven rain and other sources.
- **Stops Solar Vapor Drive** Limits incoming moisture while allowing unwanted moisture to escape the wall cavity. This prevents the moisture from inward solar vapor drive from damaging the wall cavity.
- **Superior Strength** ProLinX[®] Select is made of a cross-woven polyolefin material known for its superior strength and tear-stop design.
- **UV Resistance** ProLinX[®] Select special ultraviolet stabilizers protect it from the sun's harsh rays. In fact, ProLinX[®] Select protects against UV rays for up to 12 months.
- **Designed Translucence** ProLinX[®] Select Wrap can be installed right over the sheathing and because you can see through it, it makes framing members easy to find.
- **Wind and Tear Resistance** Heavy winds pose a threat to house wrap during installation. With its tear-stop design, ProLinX[®] Select Wrap is one of the most durable wraps around.
