Dear BlueLinx Carrier,

We're excited to announce that BlueLinx is implementing **Opendock**, a new online appointment scheduling system! This system allows you to easily schedule inbound appointments for our warehouses.
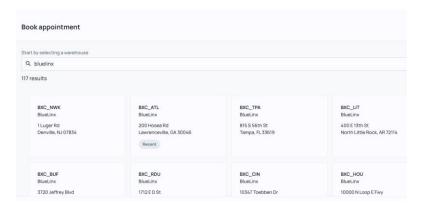

What is **Opendock**?

Opendock is dock scheduling software that connects shippers, carriers, and receivers on a single online platform, allowing for streamlined scheduling and communication. Key features of Opendock include:

- **Real-time scheduling**: Enables carriers to book and manage appointments online, reducing the need for phone calls and emails.
- **Automated notifications**: Keeps all parties informed about appointment changes, reschedules, and status updates.

Get Started Today:

1. Visit: https://schedule.opendock.com/register

2. If you already have an Opendock account, click **Sign in**.

3. If you are new to Opendock, please create an account by entering your name, email, and a password.
   If you need assistance with signing in or creating an account, please refer to the left pane of the page for more information and access to help.

4. Once registered, you can log in at: https://schedule.opendock.com/app/login.

5. After logging in, select **Book Appointment**.

6. On the **Book Appointment** page, use the search field to find the desired BlueLinx location. The example below shows results when "bluelinx" is entered in the search field.

7. Select the desired BlueLinx location then proceed with booking an appointment.

Admin Note:

1. <mark>**The current BlueLinx Scheduler will NO LONGER be available for any branch that has gone live on Opendock.**</mark>
2. All inbound appointments should be made by carriers using **Opendock**.
3. Contact your BlueLinx branch admin office if you have questions.

We're confident this will make scheduling with BlueLinx more efficient and streamlined. Thank you for your partnership!

Best Regards,
BlueLinx Transportation Team
